To whom it may Concern

**Subject: DvirCom**

We are a company of engineers that provides loss adjustment and engineering services to insurance companies and private persons. Many of the reports we author for the insurance companies are made for secondary insurers abroad and we write them in English.

DvirCom is translating our report for many years. These are reports with a lot of technical information.

The translations made by DvirCom are high level, with excellent English, deep technical/engineering understanding and exceptional and remarkable fast execution and response.

We wish to emphasize that DvirCom's work is made to our complete satisfaction.

**Sincerely,**

**Josef Verner, engineer**

**Aveor Banay Engineering and Loss Adjustment**
